EXPERIENCE SUMMARY

SOFTWARE DEVELOPER - MEDPLUS, HYDERABAD — 2016-2017

Project Name: Medplus Mart

Description: MedplusMart.Com is an online gateway and one-stop shop for all medicines and general products with Door delivery & Store Pick options. We can order medicines in different ways like search (on medicine, composition & brand), Re-order, wish list & Prescription upload. It provides wide varieties of medicines and 15000 general products across various categories and hundreds of brands.

MedplusMart is integrated with ERP application which would support the product management (Catalog, product availability, Discount Info, Alternatives, and Molecules Info), Order Management (Order Status & Previous Orders), Accounting, Customer Info (Address, Available points) and Rewards Management (For Points Redemption). As an Ecommerce Site MedplusMart is having location wise discounts, delivery types & payment options.

Environment: HTML, CSS, JavaScript, Bootstrap, AngularJS, SQL.

RESPONSIBILITIES:
- Created Responsive web pages.
- Actively involved in **gathering, analyzing and documenting** business requirements, functional requirements and data Specifications for application development.
- Created dynamic web pages using AngularJS framework. Worked on **two-way, one-way data binding**, built-in components and developed single page applications using Angular JS.
- Developed **Angular.js services** and **components** to fetch the information from the middle layers and make that data available to the templates.
- Used GIT for maintaining source code used by developers.
- Created database tables and used SQL queries to retrieve data.
- Knowledge on **Augury**.
